- Operates tools of the trade - sawzalls, grinders, and various other tools
- Ensures shop safety and housekeeping are followed

Field Supervisor-County General
Allied Universal
San Diego, CA
Full time

At Allied Universal®, we continue to build an inclusive, Be Phenomenal®, culture that encourages, supports, and celebrates a diverse workplace. It fuels our innovation and connects us closer to our customers and the communities in which we serve. We are North America's leading security services provider with over 265,000 phenomenal employees protecting over 50,000 client sites. There are countless examples of individuals who began their career as Security Professionals and today hold positions on our senior leadership team. We offer medical, dental and vision coverage, life insurance, 401K, employee assistance programs, company discounts, perks and more for all full-time positions! Start your phenomenal career with Allied Universal today!

Allied Universal is currently hiring a Field Supervisor (FS) to support operations for remotely managed accounts by performing on-site supervision of Security Professionals (SPs) and ensuring site coverage at all times. FSs work closely with Operations Managers on a day-to-day basis to supervise remote service delivery. For all full-time positions, we offer medical, dental and vision coverage, life insurance, 401K, sick pay (in states where required), employee assistance programs, company discounts, perks and more! We also offer part-time and flexible schedules!

Key Responsibilities:

- Perform day / night site visits to inspect & supervise SPs in field
- Address escalation of "after hours" & "cold start" calls to ensure sufficient coverage at customer sites
- Work with Operations Managers to coach, counsel, discipline, train, and manage relationships with SPs
- A Field Supervisor (FS) supports operations for remotely managed accounts by performing on-site supervision of Security Professionals (SPs) and ensuring site coverage at all times. FSs work closely with Operations Managers on a day-to-day basis to supervise remote service delivery.
- Responsible for visiting assigned post locations on a regular basis (specific schedule varies) to monitor performance, address daily operations issues, communicate policy changes or company information, adjust staffing schedules as needed, and make post inspections to ensure professional image (including the hygiene and uniform appropriateness of officers) and quality standards are being maintained; Post inspections also include checking that Post Order manual and all other post and training information is being properly maintained and updated, and that the Post is being properly maintained, cleaned and organized;
- Responsible for conducting on-the-job training, in coordination with Post Commander, of new employees assigned to post, or when changes to post orders are made - this may include orientation to the post, review of post orders, routine responsibilities, and how to respond to emergency situations or specific client needs;
- Respond to call-offs that occur during the FS's shift, which may include identifying other individuals to fill-in and/or standing post until such replacements arrive and also assist Scheduler with scheduling for call-offs or other changes that occur at the site;
- Identify any personnel problems occurring at posts, such as payroll issues, employee relations complaints or other concerns, and forward any such issues to Operations Manager and/or Corporate HR Director; may also be responsible for writing a report of the situation or assisting with an investigation, as directed by Operations Manager or Corporate HR Director;
- May be responsible for administering counseling or disciplinary actions that have been initiated by Branch Manager and/or Corporate HR Director; Field Supervisor may not make or initiate such decisions on his/her own, but may execute such actions at the specific direction of Branch/Corporate HR management;
- Distribute information to posts as directed by Branch or Corporate office, which may include communicating such information to Security Officers at posts and/or obtaining signed acknowledgements or other documents, and returning such documents to Branch or Corporate office;
- Respond to client or site emergencies as they arise, including ensuring appropriate communication to Operations and/or Branch Manager;
- In the event of an abandoned or open post, Field Supervisor is responsible for identifying available qualified personnel to fill the post as quickly as possible, however, Field Supervisor may be required to "stand post" on an as-needed basis for an undefined period of time, depending on business needs; this may include long-term assignments to specific posts or various posts as needed;
- Field Supervisor is responsible for maintaining all current BSIS licenses and ensuring a working knowledge of all posts within his or her regional area of responsibility;

QUALIFICATIONS:

- Delivering quality work in agile delivery model in a team environment

Qualifications & Experience:

- Knowledgeable in networking and security
- Experience managing common Azure services (Virtual Machine, Database, Storage, Virtual Network, Azure Resource Manager, etc.)
- Experience managing common AWS services (EC2, RDS, S3, VPC, CloudFormation etc.)
- Experience with containerization technologies such as Docker and Kubernetes
- Knowledgeable of configuration management frameworks such as PowerShell DSC, Puppet, Chef or Ansible
- You are comfortable interacting with customers and have the ability to communicate effectively
- Experience in basic administration of (MySQL, MSSQL, Postgres, Azure Cosmos, MongoDB, ElasticSearch)
- Azure & AWS Certifications preferred but not required
- Experience working in regulated environments (HIPAA, PCI, ITAR, etc) a plus
- Candidate must have the unrestricted right to work in the US without requiring sponsorship

B. Cloud Business Consultant

Rackspace Technology

United States Remote

Full time

We're looking for a Cloud Business Consultant to join our Cloud Optimizer team. Cloud Optimizer is a managed service focused on helping customers efficiently orchestrate their cloud resources. The attributes that make the cloud such a powerful source of technological innovation—on-demand provisioning, scalable, and elastic resources, the sheer velocity of newly launched and improved service offerings—also make cloud management a unique and complex challenge. On a day-to-day basis, you will be helping customers distill large amounts of usage data into meaningful business intelligence. The goal of the Cloud Optimizer team is to help our clients develop into more mature and innovative consumers of the cloud.

As a Cloud Business Consultant, you will need to be comfortable working with data and presenting conclusions clearly. You will also need to be at ease with general support of technology products and services. But most importantly, you need to be comfortable engaging with customers, understanding their needs, and helping them accomplish their goals.

If you have experience as a CSM (Customer Success/Service Manager), TAM (Technical Account Manager), BA (Business Analyst), Financial Analyst, or Technology Consultant and you are looking to extend your skills, then we want to talk to you!

What You'll be Doing:

- You will be assigned to 10-15 enterprise cloud customers.
- You will prepare in-depth analyses using big data and present to high-level stakeholders at our largest clients. You will prepare supporting documentation and reports for those reviews.
- Work with other Rackspace teams (professional services and managed services) to support the delivery of cloud management projects and support best practices.
- Provide financial analysis of client cloud spend including trend reporting, identification of opportunities for cloud optimization, and outlining recommendations and proposals for optimization projects.
- Demonstrate expertise in knowledge of the AWS platform, guiding each client in their utilization of AWS services.
- Provide onboarding services to new Rackspace Cloud Optimizer customers.
- Support the sales team in new business activities, as needed.
- Work on assigned key initiatives, including new service offerings, profitability analysis, tool assessments, marketing initiatives, etc.

Qualifications & Experience:

- 3+ years' experience supporting technology products or services in some capacity. Must be able to "talk tech" credibly with engineers and developers.
- Customer relationship management with some experience directly managing key stakeholder relationships.
- Data analysis and the ability to turn data into insights.
- Ability to work with our data visualization portal and easily grasp day-to-day tasks such as trend analysis and anomaly detection.
- Must be a pro-level user of Excel and be comfortable creating summaries and visuals (pivot tables and charts) to support ad-hoc report delivery.

WHO WE ARE:

Our brand, zero8hundred, refers to the start of a brand-new day as we help ease southern California's military service members and their families from one chapter of their lives to another as they transition from the military to civilian life. zero8hundred delivers online resource navigation and direct case management services through a unique relationship with the Armed Forces that allows interaction and engagement with military service members and their spouses up to a full year prior and for a full year following their transition. Resource Specialists provide direct support to individuals through telephone/email and in-person/virtual meetings to help them craft and execute an individual transition plan. Areas of support include employment preparation/placement, educational opportunities, health management (for both physical and mental health), basic needs like housing, childcare, legal aid and financial assistance and social/community connections. zero8hundred provides ongoing case management and follow-up while referring clients to trusted service providers and opportunities in these critical areas. Additionally, self-navigation to vetted local area resources, for those wanting to independently maneuver their transition, is facilitated through VetsThrive, a fully online platform powered by zero8hundred.

Since our launch in 2015, zero8hundred has provided assistance to almost 5,000 participants and has been implemented across San Diego, Riverside, Imperial, Orange and San Bernardino counties. In addition to those separating from active-duty military service, zero8hundred also serves those recent veterans, Reservists and National Guardsmen who have separated from active-duty service or returned from any 30+ day/out of area mobilization within the past year. A tax-exempt 501(c)3 since 2018, our team of 7 staff are focused on providing the resources our patriots need to ensure they thrive as they shed the role of military service member and join our southern California civilian workforce and community.

POSITION SUMMARY:

This is an extremely exciting time to join zero8hundred, and take this groundbreaking organization into its next chapter. The CEO oversees all aspects of the organization, including strategic planning, development, outreach, operations, budgeting, administration and logistics. They will be responsible for all fundraising efforts to ensure we reach our 2021 development goal of \$1 million+. This position works closely with our partner organizations which include: the US military, government agencies, elected officials, nonprofits, businesses, and philanthropic institutions. The CEO will need first-hand knowledge of the military transition experience and active relationships with the local military community at a senior level. As such, prior military experience (or experience as a military family member) is strongly desirable. The CEO will oversee a team that includes (at a minimum) the Programs Director, HR/Admin Manager, 2-5 Resource Specialists, 2-4 intern Resource Specialists, and a Marketing/Outreach Coordinator along with a contract CFO. The position requires a background check and does not include relocation.

KEY DUTIES & RESPONSIBILITIES:

Fundraising & Development (60%):

- Responsible for all aspects of fundraising and development efforts to ensure we hit our 2021 goal of \$1 million+ through corporate/foundation grants, government RFPs, private/community donors and other sources.
- Create and implement a comprehensive development strategy to include corporate, foundation, government RFP and individual giving approaches.
- Oversee and research funding sources and trends to help position the organization ahead of major funding changes or trends.
- Forge new relationships with potential funders and enrich relationships with existing funders to ensure continued and enhanced financial support.
- Diversify our funding streams, with a particular emphasis on growing our government funding opportunities and development of a base of individual donors and major gift contributions.
- Design and oversee special events to secure additional revenue opportunities.
- Prepare grant applications and required grant reports.

Organizational Leadership and Management (20%):

- Establish and maintain a vision for community impact that is achieved through the efforts of a diverse team of high-performing leaders and team members dedicated to serving those who have already served us.
- Craft organizational goals and develop strategies to ensure they are achieved.
- Foster a positive, mutually respectful work environment; manage two direct reports (Programs Director and HR/Admin Manager).
- Continue to grow and scale the organization in a fiscally responsible manner.
- Oversee operational and fiscal management of the organization, keeping the Board of Directors informed of any significant developments or opportunities.

Clearance Required? No

Job Summary:

General Atomics Aeronautical Systems, Inc. (GA-ASI), an affiliate of General Atomics, is a world leader in proven, reliable remotely piloted aircraft and tactical reconnaissance radars, as well as advanced high-resolution surveillance systems.

We recognize and appreciate the value and contributions of individuals with diverse backgrounds and experiences and welcome all qualified individuals to apply.

B. Compliance Specialist

General Atomics and Affiliated Companies

San Diego, CA

Job ID# 31295BR

Travel Percentage Required: 0% - 25%

Full-Time Salary

Clearance Required? No

Compliance Specialist IV

Job Summary:

General Atomics Aeronautical Systems, Inc. (GA-ASI), an affiliate of General Atomics, is a world leader in proven, reliable remotely piloted aircraft and tactical reconnaissance radars, as well as advanced high-resolution surveillance systems.

Are you looking to expand your skills in consulting or transition to consulting from the military? Do you have intermediate to advanced skills that will help clients manage and improve their programs? If so, a mid-level consulting role as a program management specialist might be the role for you! We are searching for the best and the brightest who are willing to roll up their sleeves and get the work accomplished for our clients while also serving as strategic advisors in their area of expertise. A program requires a significant investment of limited resources across multiple functional areas. With that level of complexity, you need skilled talent to apply functional expertise and pull all the information together for our clients to keep the program on the path to success. That's why we need you, a program management specialist who can ensure success through careful analysis, a proven and growing expertise, and effective communication.

We have opportunities for program management specialists to join our team as we help our clients build the next generation of IT products, including software, hardware, networks, radios, satellites, and more for the military and DoD. You'll work with program leadership to provide functional or program-level expertise to help ensure cost, schedule, and performance parameters of a program are met, using tools, including Microsoft Excel to support budget and tracking information, Microsoft Project to manage schedules, Microsoft Word to develop contractual and other technical documents, and Microsoft PowerPoint to develop presentations. The real power of program management comes from communication, so you'll work with other experts on the program team to complete meaningful deliverables and make recommendations for improvements to program leadership. We focus on growing as a team to deliver the best support to our customers, so you'll have resources for mentoring and learning new skills and tools. This is a chance to directly impact our service members while learning how to grow your program analyst and management skills and eliminate risks across the program. Join us and help make sure our DoD acquisition program stays on-time and within budget as we improve IT capabilities for the military!

Empower change with us.

You Have:

- 4+ years of experience with project or program management
- Experience with Microsoft Office tools, project management processes, and a program functional area
- Ability to handle ambiguity, difficult personalities, changing priorities, and failure
- Ability to obtain a security clearance
- BA or BS degree

Nice If You Have:

- Experience with direct support of a US Navy organization performing systems acquisition
- Experience with working in a program office
- Experience in a program support role or with consulting
- Knowledge of DoD acquisition and a program functional area, including scheduling, budgeting, policy, data gathering, analysis, and government contracts
- Ability to use an existing program functional area
- Possession of excellent oral and written communication skills
- Secret or TS/SCI clearance
- MA or MS degree, MBA degree, or JD degree
- PMP, Security+, or DAWIA Certification

Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information.

Build Your Career:

Consulting at Booz Allen means empowering you to provide your customers with the best support. With a consulting career at Booz Allen, you can expect:

- a large business consulting community
- access to experts in virtually every field
- a culture that focuses on supporting our employees

We have opportunities that provide stability while offering variety, so you can find the right fit for your career — and your life. You'll also have access to a wealth of training resources through our Consulting University, an online learning portal where you can access more than 5000 functional and technical courses, certifications, and books. Build your technical skills through hands-on

our internal and external communications with key stakeholders including investors and financial analysts, global media, and our employees around the world.

This role will contribute to effective delivery of legal services to our various technology and software clients, including Information technology, digital health technology (DHT), Software as a Service (SaaS), SaaS by investigating facts, researching laws, providing timely legal advice, and documenting that advice for ease of reuse. Our Technology counsel will be expected to be an expert in negotiating complex contracts involving integrations with our software offerings. The commercial legal advice provided by Technology counsel will include both routine activities and extraordinary circumstances, requiring diligence, extreme attention to detail, and the ability to respond quickly to dynamic situations. As software product offerings are often tied to patient and user data, we expect our Technology counsel to be an expert in HIPAA, CCPA, and other privacy legislation both existing and pending. Skill in negotiating business associate agreements with major health care companies a real plus.

We also expect that our Technology counsel will be on the first responder team in the event of a breach, teaming with data security, privacy, and our litigation counsel to respond. A key component of this role will be to ensure compliance with laws across the Americas geography (Canada, US) and to coordinate with other regions (EU/Asia/Latin America) to develop consistent privacy approaches to our technology solutions. As time permits, and the experience with the organization develops, the candidate should be comfortable providing advice where US and global intersect, particularly the intersection of HIPAA and GDPR.

This lawyer will also play a supporting role to our strategy and ventures team to the extent that they are evaluating investments and acquisitions in the technology space, and will be expected to possess a fair degree of experience in mergers and acquisitions.

This role reports directly to the Senior Vice President, Deputy Global General Counsel and will interact regularly with our SaaS lawyers.

Let's talk about Responsibilities:

- Provide legal support and advice on negotiation of all forms of technology agreements, with a primary focus within United States.
- Provide legal advice on internal processes & projects for all technology groups operating out of our offices in San Diego.
- Interact with and provide support to our SaaS legal team members operating in our SaaS businesses, including Brightree and MatrixCare.
- Research and advise on laws affecting the technology needs of ResMed Corp, use internal legal research skills, draft and negotiate a wide variety of business contracts and agreements and make presentations to business units and staff support groups.
- Support our global supplier alliance colleagues to the extent that they are evaluating and purchasing software solutions to support our businesses.
- Provide advice/direction in primary areas of expertise.
- Knowledge of general corporate matters, corporate governance, data sharing, license agreements, employment law, and contract management, among other topics.
- Familiarity with the regulatory laws affecting sales of medical devices and services, including Stark, anti-kickback, false claims, Open Payments, FDA, and other regulatory requirements will be a plus.
- Work closely with the Americas commercial, Intellectual Property and Global legal teams to ensure alignment and consideration of global legal requirements.

Let's talk about Qualifications and Experience:

- JD from an accredited law school. California admission or eligible for in house designation under California bar requirements plus a minimum of 5 years of legal experience with a top law firm.
- Experience in medical device, healthcare, digital health, privacy, HIPAA and HITECH is critical.
- Writes clear, concise and organized legal documents, letters and emails addressing novel or complex legal concepts and facts.
- Good research, drafting and presentation skills – will be required to research and advise on new laws and business models affecting the company.

Preferred:

- In-house experience is a plus. Litigation, mediation, arbitration and general dispute resolution experience is also appreciated.
- Familiarity with contract lifecycle management systems (e.g. Sharepoint, Apttus), and matter management is useful.
- Demonstrated ability to work collaboratively within and across business, functions and regions, as needed.

- Knowledge of SAP/R3 or similar ERP software.
- Knowledge of manufacturing work flow and MRP systems or similar.
- Ability to work in a fast paced environment.
- Experience in electronics manufacturing is a plus.
- Secret Clearance
